

A long, dark wooden pier extends from the foreground into the ocean, receding towards the horizon. The sky is a mix of orange, yellow, and blue, indicating a sunset or sunrise. The water is dark blue with white foam from waves breaking against the pier's pilings. The overall mood is serene and coastal.

# Summer 2026: Student Aid Index (SAI)

## What is a SAI?

- The [Student Aid Index \(SAI\)](#) is an index number used to establish your financial aid offer. Your SAI is calculated using information that you (and other contributors, if required) provide on the *Free Application for Federal Student Aid (FAFSA)* or California Dream Application (DREAM)
- A student's financial aid need is determined by subtracting the SAI from their total cost of attendance
  - Need determines a student's estimated eligibility for aid

## What is the source of data used in SAI calculations?

- The SAI is based on a formula that considers income, assets, and family size as reported on your aid application
- The SAI range is -1500 to 999999
  - A negative SAI indicates higher financial need

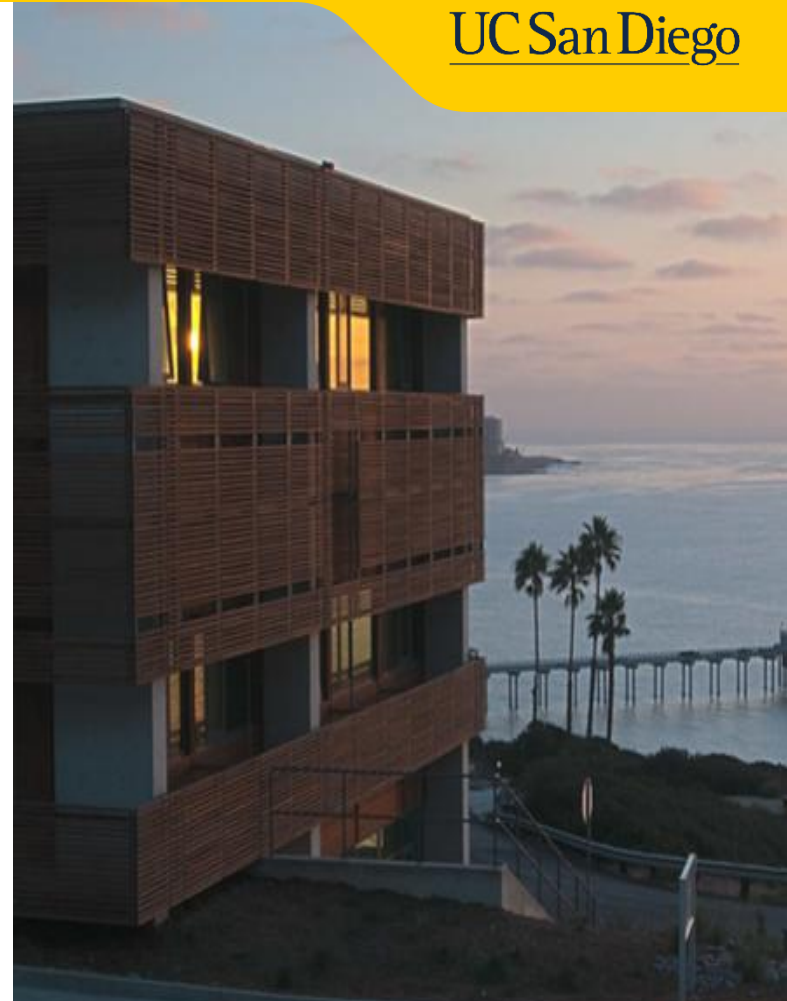

# Summer 2026: SAI, COA, and Need Determination

## What is Academic Year financial aid “Need”?

- Academic Year "Need" is the difference between the [UC San Diego cost of attendance](#) (your estimated costs) and your student aid index (SAI), as determined by your FAFSA or DREAM application
- Students with Academic Year “Need”, a valid 25-26 FAFSA or DREAM application, a valid SAP status, and meet the Summer Session enrollment requirements will be considered for a summer aid offer

## What is Summer “Need”?

- Summer “Need” is the difference between your [UC San Diego summer cost of attendance](#) and your student aid index (SAI), as determined by your FAFSA or DREAM application
